

SPENCER ENVIRONMENTAL

MANAGEMENT SERVICES LTD.

Plant Ecologist

Spencer Environmental is seeking a Plant Ecologist for a 1.5 year term position for its Edmonton office, beginning in early May 2018. The successful applicant will undertake plant community and rare plant surveys and analyses, and document findings in technical reports. Familiarity with Alberta flora and landscapes and well developed skills in field identification of vascular plants and weeds are required. Knowledge of wetland vegetation and wetland classification systems would be an asset.

In addition to plant ecology work, the successful candidate will perform as an integral member of the firm's multi-disciplinary Environmental Impact Assessment teams with responsibility for preparing vegetation-specific environmental assessments and contributing in other ways to preparing EIA reports.

The successful applicant will possess a master's degree in plant ecology or equivalent subject area. Some experience in preparing EIAs or biophysical assessment documents would be an asset. Some consulting experience would also be beneficial.

Spencer Environmental is a long-established environmental consulting company that offers its employees an attractive package of financial compensation and benefits and a multidisciplinary work environment.

Applications should be submitted to the attention of Richard B. Spencer, M.Sc.:
